Babajide Oyafemi

Full-Stack & AI Engineer · TypeScript, Python, LLM Systems

j.oyafemi@gmail.com | +44 7440 737057 | Bradford, UK | Portfolio | GitHub | LinkedIn

PROFILE

Full-stack and AI engineer with 7+ years shipping production systems end to end, from data model and API through to the interface users touch. Currently leading development of healthcare platforms serving 5,000+ users and supporting £300k+ in annual revenue, with LLM-driven workflows taken from prototype into production. Previously designed and built an AI assistant serving 1,000+ users. MSc in Applied Artificial Intelligence, with dissertation research on reinforcement learning for cost-aware portfolio rebalancing.

TECHNICAL SKILLS

AI & ML: LLM integration into production workflows, prompt engineering, OpenAI APIs, HuggingFace Transformers, PyTorch, reinforcement learning, evaluation design

Languages: TypeScript, Python, JavaScript

Backend: Node.js, NestJS, Express, Django; REST, GraphQL; Celery and Bull job queues

Frontend: React, Next.js, TailwindCSS

Data: PostgreSQL, MongoDB, Redis; Prisma, Drizzle, TypeORM

Infrastructure: AWS, Docker, GitHub Actions, Jest, automated testing

PROFESSIONAL EXPERIENCE

Senior Full-Stack Engineer
Jun 2025 – Present

TSoul Consulting, United Kingdom

- Integrated LLM-driven workflows to automate operational processes, taking them from prototype to production.
- Lead development of healthcare platforms serving 5,000+ users, on systems supporting approximately £300k in annual revenue.
- Built full-stack architecture for scheduling and workforce management, designing and implementing 20+ APIs and the interfaces on top of them.
- Improved system performance by approximately 30% through query optimisation and more efficient data handling.

Full-Stack Engineer
Nov 2024 – Nov 2025

HEX Africa

- Designed and built an AI-powered assistant integrating LLM workflows, serving 1,000+ users.
- Built the full backend serving both the admin dashboard and the mobile application, from scratch.
- Built the admin frontend dashboard and landing page; reduced system errors by approximately 25% through improved validation and architecture.

Full-Stack Engineer
Oct 2023 – Mar 2025

Kampus360

- Created the entire backend architecture for GenSwift, a bespoke enterprise application, from scratch.
- Led the backend team delivering bespoke web applications for a major client (Papyrus).
- Built the backend for a retail point-of-sale platform handling high transaction volume, and the frontend for an e-commerce product.

Full-Stack Engineer
Apr 2024 – Sep 2024

Dormot

- Built client web and mobile applications from scratch; mentored junior developers.

Full-Stack Web Developer
Nov 2022 – Apr 2024

Panthers Insights

- Built backend and frontend features for the company property management application, including authentication and data handling.

Full-Stack Web Developer
May 2022 – Nov 2022

Ever Technologies

- Built company and client web applications from scratch as part of the delivery team.

Freelance Full-Stack Engineer
Dec 2018 – 2025

Upwork and direct clients · full-time until 2022, then alongside employment

- Delivered 50+ projects across fintech, payments, healthcare and e-commerce, owning scoping, build and deployment; 95%+ client satisfaction with repeat engagements.

EDUCATION

MSc, Applied Artificial Intelligence — University of Chester, UK 2026

MSc, Electrical & Electronic Engineering — University of Lagos, Nigeria 2024

BEng, Electrical & Electronic Engineering — University of Ilorin, Nigeria 2015

Right to work: applying for the UK Graduate visa (no sponsorship required). Available immediately; remote, hybrid or on-site.
